Further course dates to follow...

The Emergency Management of Severe Burns (EMSB) course provides burn specific trauma management guidelines, which are additive and complimentary to those taught on other trauma courses eg ATLS. EMSB is a “stand alone” one-day course that covers the principles of the emergency management of severe burns in the British Isles including practical exercises in burn size assessment, fluid resuscitation, airway and wound management, paediatric burn care, electrical and chemical injuries and simulated cases.

The course is appropriate for medical and nursing practitioners who may be required to provide initial management to patients with severe burn injuries e.g. those working anywhere in the field of burn care, anaesthesia, trauma, pre-hospital and emergency medicine.

The EMSB course has been awarded 8 consultant CPD credits

Course fee: £395 to include lunch and refreshments

To book online: <https://www.britishburnassociation.org/emsb-courses/>
